

AGP580

ISTRUZIONI DI
MONTAGGIO
ASSEMBLY
INSTRUCTIONS

ferramenta bilico orizzontale
horizontal pivot hardware

release 07-2026

larghezza | width

950 - 1090

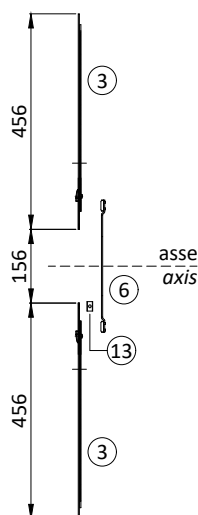

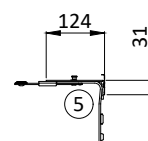

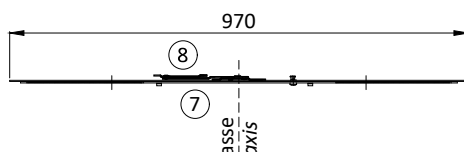

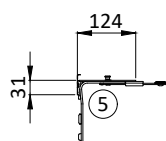

altezza | height

590 - 1132

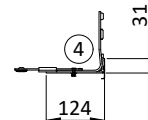

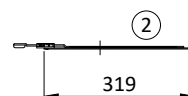

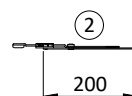

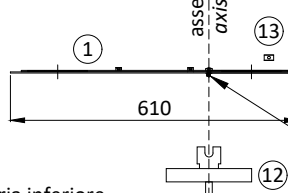

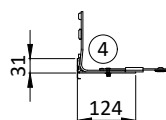

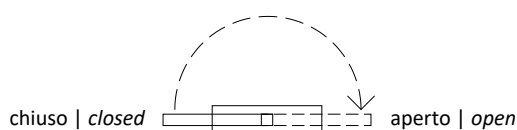

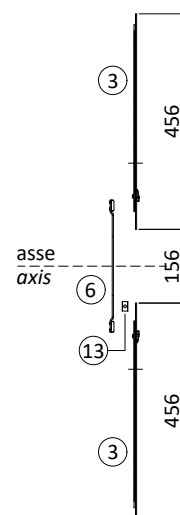

AGP580.Y1

- ⑪ riscontro nottolino standard - mezzeria superiore
standard cam strikes - upper centre line

n.	DESCRIZIONE DESCRIPTION
1	elemento di collegamento orizzontale inferiore con nottolini ridotti lower horizontal connection element with reduced cams
2	prolunga di collegamento extension piece
3	elemento di collegamento verticale vertical connection element
4	rinvio angolo inferiore con nottolino ridotto lower corner drive with reduced cam
5	rinvio angolo superiore upper corner drive
6	elemento di collegamento sullo snodo bilico connecting element on the pivot hinge
7	elemento di collegamento orizzontale superiore upper horizontal connection element
8	braccetto limitatore apertura restrictor arm
9	riscontro nottolino ridotto reduced cam strikes
10	riscontro anti falsa manovra mishandling device strike
11	riscontro nottolino standard standard cam strikes
12	cremonese cremone
13	compensatore cava ferramenta hardware groove adapter

- ⑨ riscontro nottolino ridotto - mezzeria inferiore
reduced cam strikes - lower centre line

- ⑩ riscontro anti falsa manovra - rinvio angolo inferiore sinistro
mishandling device strike - left lower corner drive

con ferramenta bloccata, posizionare il nottolino in asse al serramento per collegamento alla cremonese (12)
with locked hardware, place a cam in the axis of the window frame for connection to the cremone (12)

Confidenziale/Riservato - Tutti i diritti riservati - È vietato copiare, distribuire o mettere altrimenti in circolazione salvo espressa autorizzazione di SECCO SISTEMI S.P.A. - Le violazioni saranno perseguite ai sensi di legge
Secret and Confidential - All rights reserved - No copy, dissemination, circulation is allowed unless specifically authorised in writing by SECCO SISTEMI S.P.A. - Any violation shall be legally prosecuted

AGP580.A7

- ⑪ riscontro nottolino standard - mezzeria superiore
standard cam strikes - upper centre line

n.	DESCRIZIONE DESCRIPTION
1	elemento di collegamento orizzontale inferiore con nottolini ridotti lower horizontal connection element with reduced cams
2	prolunga di collegamento extension piece
3	elemento di collegamento verticale vertical connection element
4	rinvio angolo inferiore con nottolino ridotto lower corner drive with reduced cam
5	rinvio angolo superiore upper corner drive
6	elemento di collegamento sullo snodo bilico connecting element on the pivot hinge
7	elemento di collegamento orizzontale superiore upper horizontal connection element
8	braccetto limitatore apertura restrictor arm
9	riscontro nottolino ridotto reduced cam strikes
10	riscontro anti falsa manovra mishandling device strike
11	riscontro nottolino standard standard cam strikes
12	cremonese cremone
13	compensatore cava ferramenta hardware groove adapter

- ⑨ riscontro nottolino ridotto - mezzeria inferiore
reduced cam strikes - lower centre line

- ⑩ riscontro anti falsa manovra - rinvio angolo inferiore sinistro
mishandling device strike - left lower corner drive

con ferramenta bloccata, posizionare il nottolino in asse al serramento per collegamento alla cremonese (12)
with locked hardware, place a cam in the axis of the window frame for connection to the cremone (12)
